

October 2024

Headline summary

- The Relay UK app has been updated several times during the year to improve layout, navigation and overall performance, as well as extending the connection status information available and introducing a dark mode option on selected computer versions
- Development of a new digital platform is progressing well and it's planned to fully migrate the Relay UK service over to this new platform during the first part of 2025
- A series of short animated video clips have been created and made available on the [website](#). These are designed to guide anyone new to the service, how to install, set up and start using the app on supported Android, Apple and Windows devices
- The bi-annual customer satisfaction survey was carried out in September 2024 with over 89% of participants being satisfied with the Relay UK service overall. A detailed report is published separately
- Whilst the overall number of calls made via Relay UK continues to slowly decline (in line with broader voice telephony trends across the UK), the proportion of these calls made using the app continues to increase, with over 87% of users favouring the app over traditional textphones in September 2024

Service performance:

- Call answering and typing speed metrics have performed strongly, with all the respective KPIs comfortably achieved throughout the year
- Quality performance metrics dipped a little below target between April and July. A lot of attention was given to this during the summer, with increased monitoring and coaching and this resulted in an improving performance, with targets achieved again during August and September
- The percentage of calls subjected to an automatic handover exceeded the 2% target in August and September and is a key area of focus for improvement as we move into the autumn period

Reported monthly Key Performance Indicators are presented in Annex 1
